

VERIFY THE SCALE

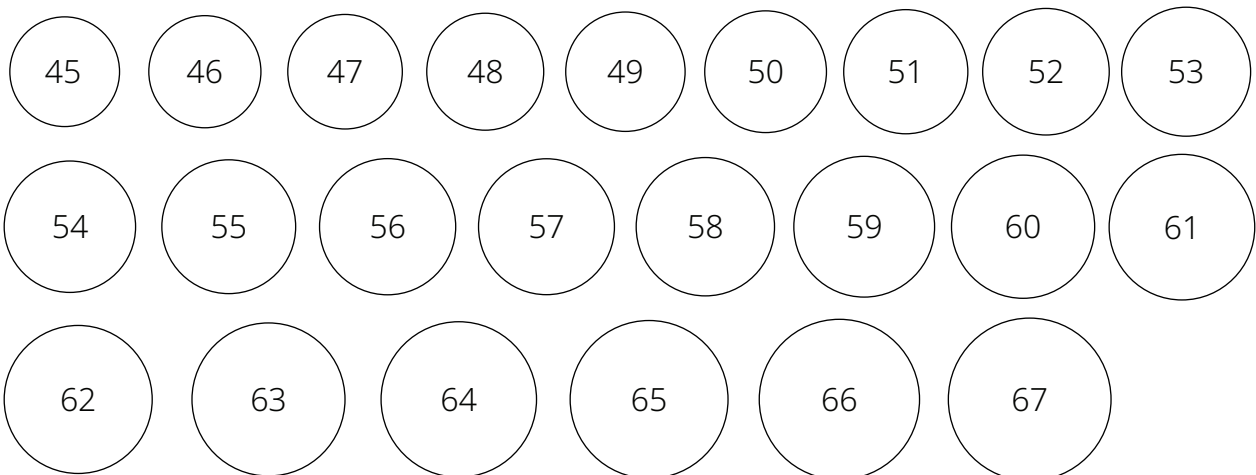

Before taking measurements, ensure the guide is printed in A4 format and accurately scaled (100%). Below are some rules you can measure to assure yourself of the sizing.

MEASURE YOUR RINGS

Select a ring that fits the desired finger.
Position the ring over the circles below. The correct size is the one where the circle matches perfectly with the inside edge of the ring.

If you are unsure between two sizes, choose the larger one.

MEASURE YOUR FINGER

1. Cut out the ruler
2. Wrap the ruler around your finger, noting the size.
3. Ensure the ring fits comfortably by measuring the thickest part of your finger, typically at the joint, allowing easy on and off.

For optimal sizing, it's best to avoid measuring when temperatures are extremely cold or hot.
